## Executive Summary

Uganda Manufacturers Association (UMA) is running an internship program under the Higher Education, Science and Technology project funded by the African Development Bank (AfDB) in partnership with the Government of Uganda (GoU), Ministry of Education Science, Technology and Sports (MoESTS), Africa Development Bank (AfDB), and the eight Benefiting Institutions (BIs).

The main goal of the project is **to improve the skills of 2000 interns from eight Benefiting Institutions** (BIs) namely; Kyambogo University (KYU), Busitema University (BU), Makerere University (MUK), Gulu University (GU), Mbarara University of Science and Technology (MUST), Muni University (MU), Uganda Management Institute (UMI) and Makerere University Business School (MUBS). Ninety percent (90%) of the students to be placed in the respective companies should be offering Science and Technology Courses while ten percent 10% should be Arts students. The project is providing skills to interns required by employers in Uganda to enhance their opportunities of employment in the future.

The UMA-HEST project requested for 66 students from MUST in 2015, although the target for MUST was 46. MUST forwarded a list of 43 (22 Female and 21 Male) students for the Internship program from the Science and Technology (S & T) background.

During the period under review (July to December 2015), 39 students attended the UMA-HEST internship induction which was a two-day training program held at UMA. 22 interns (56.41%) of the interns in the database were placed to 14 companies, 18.2% of interns placed were retained (4 interns), and 9 interns (23.08%) got employment in other companies. Of the 39 students who attended the induction training, 8 interns (20.51%) have not yet been placed but the UMA-HEST Project Team is planning to find slots for all of them in different companies before April, 2016.

***The UMA-HEST Project also has a projection of placing 82 students in 2016, therefore, MUST is being requested to forward a list of 124 students to enable us to plan appropriately. This number also includes those interns from the College of Medicine and Pharmacy***

## 1. INTRODUCTION

Mbarara University of Science and Technology had a target of placing 66 students in 2015 but only sent 43 students. Of these, 39 students attended the UMA-HEST Induction program on 18<sup>th</sup> and 19<sup>th</sup> of June 2015 at UMA. 56.4% (22) of the students recommended to UMA-HEST Project, who were placed to different companies in 2015. However, the target was not hit in 2015 and this is attributed to majority of the students who were not ready to work in Kampala because they didn't have relatives around.

The nominated students attended a two-day induction training of the UMA-HEST Project at UMA from 18<sup>th</sup> to 19<sup>th</sup> of June 2015. The main objectives of the training were to build confidence and enhance teamwork among students by improving on their communication and interpersonal skills.

In addition to the above, 50% (11) of the students placed are Female students equaling to the number of Male students placed 50% (11). Actually, 86.3% (8 female and 11 male) of the students placed completed their internship successfully and 4 interns (18.1%) of the students were retained. 8 interns (36.3%) of the students sent have not yet been placed, we are confident they will all be placed in 2016.

During the period under review, Bachelor of Computer Science and Information Technology, are the courses from which most of the interns were placed. A total of 14 companies accepted interns to carryout internship, Steel and Tube Industries Ltd and Canopy It Solutions were the leading companies.

The chapters ahead will detail the general information and proceed with placements of interns, course distribution, gender distribution, interns per company, retained interns, challenges and mitigations, interns not yet placed and finally end with skills attained.

## 1.1 General information about the interns

All the interns that were considered for placement from MUST were required to present nomination letters stamped and signed by the university as a basic requirement for placement.

All students placed were given an offer and introduction letter by the UMA-HEST Team, to introduce them to the different companies. The offer letter constitutes the code of conduct, terms and conditions that bind all students who sign it before starting the internship in different companies.

MUST forwarded a list of 43 students but only 39 students (20 Male and 19 Female) who attended the induction training were inculcated in the UMA-HEST database. Bachelor of Computer Engineering (11), Computer science (12) and information Technology (15), Dip. In Science Laboratory technology (1), are the courses from which the interns were placed to different companies.

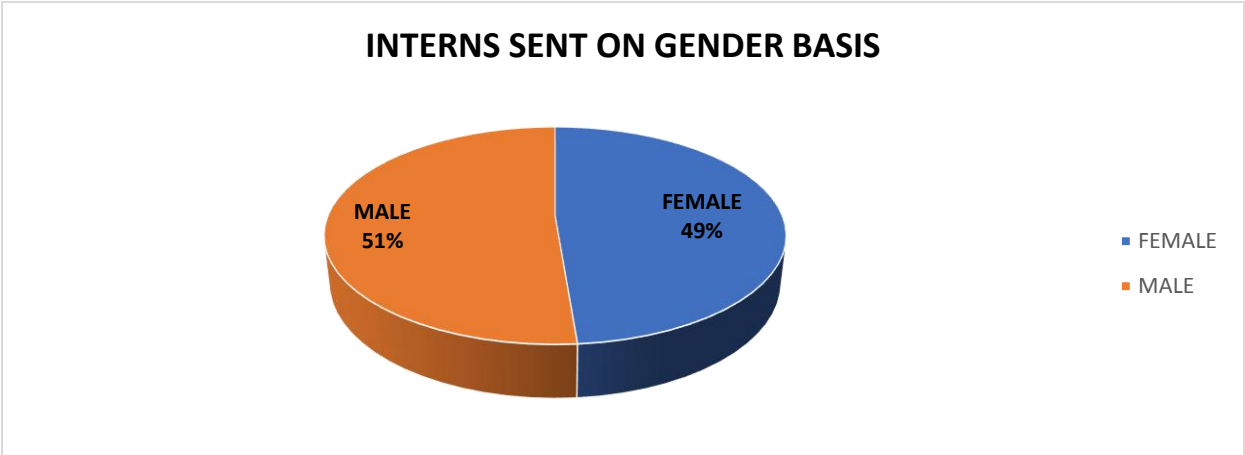

A total of 22 interns were placed, 50% male and 50% female students. 18.18% of the interns were retained in different companies for example Steel and Tube Industries Ltd (1), Toyota (U) Ltd (1) and Canopy IT Solutions (2).

**Table 1: Total composition of Interns recommended by MUST on Gender basis**

Gender	INTERNS RECOMMENDED	% COMPOSITION
FEMALE	19	48.72%
MALE	20	51.28%
<b>Grand Total</b>	<b>39</b>	<b>100.00%</b>

Figure 1: Interns recommended by MUST on Gender basis

The different courses form which students were recommended by the University were Four (4) and all from the same college that is IT.

Table 2: Total number of interns sent per course

COURSES	INTERNS RECOMMENDED	% COMPOSITION
Bachelor Of Computer Engineering	11	28.21%
Bachelor Of Computer Science	12	30.77%
Bachelor Of Information Technology	15	38.46%
Dip. In Science Laboratory technology	1	2.56%
Grand Total	39	100.00%

Figure 2: MUST Students during the 2 Day induction training at UMA.

## 1 Placement of Interns

Placement of interns from MUST commenced in July 2015 following their induction training in the previous month. Out of 39 students, 22 students were placed to different companies. The biggest number was placed in July (12). The number of students placed kept on reducing in the subsequent months to 3 in October, 5 in November and 2 in December. One student was not accepted in July, and 2 left the companies before the end of their internship period hence reducing the number to 19 (8 female and 11 male.)

One student doing a Diploma in Science Laboratory Technology was added on the program after getting herself a company to train with. The table below shows the general placement of students in the different months.

Figure 3: Some of the students placed at Steel & Tube Industries Ltd.

Left: Rugamba Blaise (first person left), Nyanzi Ruth (Second person on the right) and Nabeta Geoffrey (Centre with Yellow Gloves) are some of the interns.

Table 3: General placement of interns on Monthly basis

MONTH	FEMALE	MALE	Grand Total
JULY	6	6	12
OCTOBER	1	2	3
NOVEMBER	3	2	5
DECEMBER	1	1	2
<b>Grand Total</b>	<b>11</b>	<b>11</b>	<b>22</b>

Figure 4: Monthly Placements on Gender basis

Figure 5: Percentage composition of Total interns placed per month

The highest number of interns placed (60%) was recorded in the month of July with 12 interns, it was also noted that students were placed in equal proportions (6 male and 6 female). July was followed by November where 5 interns were placed, October had 2 interns and lastly December where only 1 intern was placed.

### 1.1 Actual placement

Out of the 22 students placed, 2 Interns Left the company before the end of the training and 1 was not accepted by the company hence reducing the total number of interns placed to 19 (8 Female and 11 Male). The table below shows the actual number of interns in the different months.

Table 4: Total number of actual interns who completed the training placed per month

MONTH	FEMALE	MALE	Grand Total
JULY	5	6	11
OCTOBER		2	2
NOVEMBER	3	2	5
DECEMBER		1	1
<b>Grand Total</b>	<b>8</b>	<b>11</b>	<b>19</b>

Figure 6: Actual interns that completed training per month

Figure 7: Percentage composition of the Actual interns who completed training per Month

For the actual interns; as illustrated above, most of the interns placed in the different companies actually completed their training with those companies for the stipulated period of time. 19 interns (85.23%) of the total interns placed actually completed their internship training.

## 2 Course distribution of Interns

Companies offered students training opportunities from 4 courses namely; Bachelor of Computer Science, Computer Engineering, Information Technology and Diploma in Laboratory Technology.

Bachelor of Information Technology (15) had the biggest number of placements followed by Computer Science (12). The distribution of Interns per month are shown in Table 5 below.

Table 5: Course Distribution of Interns Recommended by MUST

COURSES	INTERNS RECOMMENDED	% COMPOSITION
Bachelor Of Computer Engineering	11	28.21%
Bachelor Of Computer Science	12	30.77%
Bachelor Of Information Technology	15	38.46%
Dip. In Science Laboratory technology	1	2.56%
<b>Grand Total</b>	<b>39</b>	<b>100.00%</b>

## 2.1 Total Placement per course

Total of 22 students who offered different courses were placed to different companies. Majority of the students placed offered Bachelor of Information Technology (9), Computer Engineering (6), Computer science (6) and Dip.in science laboratory technology (1).

Table 6: Internship placement per course

COURSES	INTERNS PLACED	% COMPOSITION
Bachelor Of Computer Engineering	6	27.27%
Bachelor Of Computer Science	6	27.27%
Bachelor Of Information Technology	9	40.91%
Dip. In Science Laboratory technology	1	4.55%
<b>Grand Total</b>	<b>22</b>	<b>100.00%</b>

## 2.2 Actual per course

Out of the 22 students placed, 19 were able to complete their internship and majority had offered Information Technology (9). The table below displays the results for other courses from which interns completed their internship. Overall, 47.37% of the actual students were doing bachelor of information technology, 26.32% Computer Engineering and 26.32% Computer science. Bachelor of information technology had the largest number of interns who completed successfully and this is attributed to the positive attitude they conveyed while at the company premises.

Table 7: Actual Internship placement per course

COURSES	INTERNS PLACED	% COMPOSITION
Bachelor Of Computer Engineering	5	26.32%
Bachelor Of Computer Science	5	26.32%
Bachelor Of Information Technology	9	47.37%
<b>Grand Total</b>	<b>19</b>	<b>100.00%</b>

### 3 Gender Distribution

MUST recommended a total of 39 interns with 19 Female interns and 20 Male interns.

Table 8: Gender composition of interns recommended

Gender	INTERNS RECOMMENDED	% COMPOSITION
FEMALE	19	48.72%
MALE	20	51.28%
<b>Grand Total</b>	<b>39</b>	<b>100.00%</b>

Figure 8: percentage composition of interns sent on Gender Basis

#### 3.1 Gender per course

Out of the 39 recommended interns, 22 had been placed as of 30<sup>th</sup> December. The highest number of female interns recommended by MUST offered Bachelor of Computer Science (7) and Bachelor of Information Technology (7) well as the highest number of Male interns offered Bachelor of information Technology (8) followed by Bachelor of Computer Engineering (7). There were no Male interns recommended from the Dip. In Science Lab and Technology.

Table 9: Gender composition per course of interns recommended

COURSES	FEMALE	% COMPOSITION	MALE	% COMPOSITION	Grand Total
Bachelor Of Computer Engineering	4	36.36%	7	63.64%	11
Bachelor Of Computer Science	7	58.33%	5	41.67%	12
Bachelor Of Information Technology	7	46.67%	8	53.33%	15
Dip. In Science Laboratory technology	1	100.00%		0.00%	1
<b>Grand Total</b>	<b>19</b>		<b>20</b>		<b>39</b>

### 3.2 Gender per month

Generally, students were steadily distributed to different companies in the different months. 12 students in July (6 female and 6 male), 3 in October (2 male and a female), 5 in November (2 Male and 3 female) and lastly in 2 in December (a female and a male student).

There was an equal Gender Distribution of Students in regards to placement in July and December, however in the other months, male students dominate female in October (2 male and a female); in November female dominated male (3 female and 2 male)

Table 10: Gender Composition of interns placed on monthly basis

MONTH	F	M	Grand Total
JULY	6	6	12
OCTOBER	1	2	3
NOVEMBER	3	2	5
DECEMBER	1	1	2
<b>Grand Total</b>	<b>11</b>	<b>11</b>	<b>22</b>

## 4 Interns per Company

14 companies and organizations accepted interns to train and get equipped with practical skills that have made them more productive in this very competitive job market. Steel and Tube Industries Ltd (5), National Water and Sewerage Corporation-NWSC(2) are some of the companies that accepted larger numbers of interns to train with them. Most of the interns were able to meet the expectations of their supervisors in the respective companies. The distribution of interns taken per company is shown in Table 11 below;

Table 11. Interns taken per company on Gender basis

COMPANY	FEMALE	MALE	Grand Total
Canopy IT Solutions		2	2
Easy Systems	2		2
Intelligent Solutions Ltd	1		1
Kajjansi Brick&Tile Works Ltd		1	1
Mafarin Energy Co. Ltd	1		1
Mega Tech School of Computing		1	1

RECO Industries	1		1
SESACO	1		1
Steel &Tube Industries Ltd	1	4	5
Toyota (U) Ltd	2		2
<b>Grand Total</b>	<b>11</b>	<b>11</b>	<b>22</b>

## 5 Interns Retained

### 5.1 Internship status after completion of the HEST Internship

The interns who were placed in July finished the three months internship training period in the respective companies. 4 interns (18.18%) of the interns placed were able to meet the employer's expectations and were retained and others (3) given an extension after their internship period. The internship training imparted skills and exposed students to different opportunities and 5 students had started working before being placed in different companies.

Table 12: Interns retained on gender basis

	FEMALE	MALE	Grand Total
<b>INTERNS RETAINED</b>	<b>2</b>	<b>2</b>	<b>4</b>
% COMPOSITION	50.00%	50.00%	100.00%

### 5.2 Interns Retained per month

On monthly basis, Interns were only retained in 2 of the 4 months and most of the Interns were retained in July (2 Male) and October (2 Female).

Table 13: Interns retained on Monthly Basis

MONTHS	FEMALE	MALE	Grand Total
JULY	2		2
OCTOBER		2	2
<b>Grand Total</b>	<b>2</b>	<b>2</b>	<b>4</b>

### 5.3 Interns Retained per course

On basis of the courses, Interns from the following courses were retained.

Majority of the Interns retained were from Computer Science (2- 1 female and 1 male). The other 2 interns who were retained offered a degree in Bachelor of Information Technology and Computer Science each respectively.

Table 14: Interns retained on Course basis

COURSES	FEMALE	MALE	Grand Total
Bachelor Of Computer Engineering		1	1
Bachelor Of Computer Science	1	1	2
Bachelor Of Information Technology	1		1
<b>Grand Total</b>	<b>2</b>	<b>2</b>	<b>4</b>

#### 5.4 Interns Retained per company

On basis of the companies, Interns from only three (3) companies were retained.

Majority of the Interns retained had their training in Canopy IT Solutions and all of them were Male.

Table 15: Interns retained on basis of companies

COURSES	FEMALE	MALE	Grand Total
Canopy IT Solutions		2	2
Steel & Tube Industries Ltd	1		1
Toyota (U) Ltd	1		1
<b>Grand Total</b>	<b>2</b>	<b>2</b>	<b>4</b>

#### Reasons for retention of the Interns;

- The Interns exhibited excellent working skills at the different work places.
- The Interns engaged in finding solutions to problems at the work place.
- Time management, excellent communication and practical skills enabled interns to be retained.

## 6 Challenges and Mitigations

CHALLENGE		MITIGATION
1.	<b>Interns not Honoring the agreement;</b> Some students accepted to go and train with a particular company but on reaching there (at the company), they refused to train giving reasons of poor working conditions and the distance from Home.	The UMA-HEST team has tried to solve this by providing all the necessary information about the company to the interns before they are sent to the field to train and to lower expectations to suit the reality on the ground.
2.	<b>Wrong personal information;</b> Some students provided wrong account details. This delayed their stipends as they bounced several times from these accounts and also reduced the amount they were supposed to get which left them complaining.	The UMA-HEST Team has invented better data collection tools that will capture this information more than once to avoid any errors. These include using both the computer (excel) plus written copies on paper in addition to calling them to verify before the money is sent.
3.	<b>Poor intern-employer communication;</b> Failure of students to communicate when they leave a company where they have been placed. This leaves the employers displeased and hesitant to take in more of our interns.	The project team endeavors to make courtesy calls to both the interns and their supervisors after they have started their training to find out how the interns are progressing.  Company visits are also made to meet and interact directly with both the supervisors and the interns.
4.	<b>Delay to hand in reports;</b> Some students take long to send their monthly reports. This makes it hard for the Placement Officer to process their monthly stipends in time since the interns are paid after sending reports.	The HEST team starts reminding the students immediately after they have started their internship to send their reports and monthly targets.

## 7 Interns Not Yet Placed as of 31<sup>st</sup> December 2015

8 interns (20.51%) of the students in the database (39) have not been placed but the UMA-HEST Project is hopeful that they will all be placed to different companies in 2016; a total of 4 male and 4 female students mainly offering Bachelor of Computer Engineering and Information Technology. The number of interns not yet placed is attributed to limited knowledge of expertise among students (according to employers).

Table 16: Courses of interns not yet placed on Gender basis

COURSES	FEMALE	MALE	Grand Total
Bachelor Of Computer Engineering		2	2
Bachelor Of Computer Science	3	1	4
Bachelor Of Information Technology	1	1	2
<b>Grand Total</b>	<b>4</b>	<b>4</b>	<b>8</b>

## 8 Skills Attained

Students attained various skills during the internship, some of these were soft skills and others were professional skills.

The professional skills include;

- i. Networking skills
- ii. Web design skills
- iii. Occupational Health & Safety
- iv. Equipment handling skills
- v. Report writing skills

The soft skills include;

- i. Interpersonal & attitude change skills
- ii. Time management skills
- iii. Communication skills
- iv. Team work skills
- v. Entrepreneurship

- vi. Grievance handling skills
- vii. Personal Development

It should be noted that the interns gained a lot of experience in their different fields and some can be able to set up their own companies, given the funding.

## 9 Way forward

Given the current performance of the UMA-HEST project with respect to Mbarara University of Science and Technology, the HEST project will be targeting to place 82 students from MUST in 2016. The UMA-HEST team is therefore requesting for 124 students who will train for a period of three (3) months.

## 10 Conclusion

In conclusion, placement of Interns in the first year of the HEST Project was greatly achieved (22 Interns) which constitutes 56.41 percent of the total interns recommended, and 5 interns (12.8 %) got employment before placement. Many Interns have acquired knowledge and practical skills in their fields of study where some have been retained (4), others are still training in companies where they were placed which has greatly benefited them and is in line with the major goal of the project.

***Higher Education being the heart of Education as well as the core of National and Development Systems, the UMA-HEST Project team would like to thank the Government of Uganda (GOU), Funders (AfDB), University Coordinators, Employers, Interns and other stakeholders at large who have played a tremendous role in the implementation of the HEST Project. We therefore look forward to placing 82 Interns from MUST in the second year of the Project (2016). But request the University to recommend 124 interns for Placement. We are looking forward to your priceless cooperation in the next period of the Project***

Your Ref:

Dear .....

### RE: OFFER TO PARTICIPATE IN UMA – HEST INTERNSHIP PROJECT

We are delighted to inform you in writing that you have been given an offer to participate in the UMA–HEST Internship Project. Having been selected by your institution to benefit from the Project and having attended a two days training at UMA, you shall be posted to ..... as your host company. Your internship will run from .....until ..... provided that the terms and conditions for your placement are fulfilled as follows:

#### **Your Obligations:**

1. You will uphold the Intern Code of Conduct, out- lined herein.
  - a) Adhere to the rules and regulations of the company where you are placed. This includes all health and safety regulations.
  - b) Undertake and complete three months internship placement with the company.
  - c) Act professionally at all times, upholding the good name and integrity of the UMA - HEST Internship Project and the company where you are placed.
  - d) Maintain in confidence any information learnt about the activities and/or operations of the company and UMA –HEST Project during your placement.
  - e) Not, except as permitted by your Workplace Supervisor, carry out or be engaged in private business or practice that negatively affects your internship duties.

#### **2. Hours of Work:**

You will conform to the hours of work as stipulated by the company where you are placed i.e. 8:00am – 4:30pm with one hour for lunch. You may, from time to time, be required to work reasonable additional hours for which time off in lieu can be taken if approved by your Workplace Supervisor. You will be required to always sign the daily attendance register i.e. time of arrival and time of departure.

#### **3. Stipend:**

UMA – HEST Project will pay you a total stipend amounting to UGX 700,000/= net (seven hundred thousand shillings only).The Project will only deposit stipends to your Bank Account upon receiving at least 4 (four) weekly, quality, timely targets per month. Reports should be **approved and signed** by your Work Place Based Supervisor.

UMA Regional Office: JINJA: 47/49 Main Street, Jinja. E-mail: [umaregionaloffice@gmail.com](mailto:umaregionaloffice@gmail.com)

The installments shall be as follows:

Date	Item	Amount
1 <sup>st</sup> February 2016	<i>Insurance premium to be deducted</i>	36,000/=
30 <sup>th</sup> February 2016	1 <sup>st</sup> Financial Disbursement	180,000/=
30 <sup>th</sup> March 2016	2 <sup>nd</sup> Financial Disbursement	170,000/=
30 <sup>th</sup> April 2016	3 <sup>rd</sup> Financial Disbursement	160,000/=
30 <sup>th</sup> May 2016	4 <sup>th</sup> Financial Disbursement	154,000/=
	<b>Total</b>	<b>700,000/=</b>

Payment of any installment of the stipend will depend on the recommendation of your Workplace Supervisor, OR any other officer assigned that duty by the Host Company and approval by the UMA Internship Placement Officer or any other accredited official.

#### 4. Reporting:

You will be reporting to the Workplace Supervisor who will be identified by the company. You will be required to provide quality and timely reports as per instructions of the reporting template found on the UMA Portal [hest.uma.or.ug](http://hest.uma.or.ug)

#### 5. Supervision:

The role of the Workplace Supervisor will be to provide ongoing feedback and leading performance reviews. He /she will work in the same department/section with you or be otherwise closely connected to your activities, as well as overseeing your day-to-day tasks. The feedback will be shared with all the stake holders of the UMA – HEST Project.

#### 6. Insurance:

Since Insurance was not catered for in the approved budget UMA–HEST Project has identified an insurance service provider after consulting the funders. Signing this offer letter will give UMA-HEST Project lieu way to incorporate you in the insurance policy which will be provided to you outlining your coverage.

Please note that this offer does not constitute a contract of employment with UMA – HEST Project but is an offer to participate in our Internship Project. UMA - HEST Project will not provide any benefits or entitlements other than those outlined in this offer.

If you accept the above terms, sign the copy of this letter and return it to the undersigned before ....., 2016.

Yours sincerely,

**Uganda Manufacturers Association**

  
Sebagala M. Kigozi  
Executive Director

I ..... accept the appointment under the given terms and conditions of service.

Signed ..... Date: .....

<b>Student Name:</b>	FELIX ATUHAIRE		
<b>HEST No:</b>	IP15MUST/021N5	<b>University No:</b>	2011/BCE/011/Ps
<b>Organization:</b>	MBARARA UNIVERSITY OF SCIENCE AND TECHNOLOGY		
<b>Unit:</b>	NETWORK MAINTENANCE AND SERVICES IN ITR-MUST		
<b>Department:</b>	MBARARA COMPUTING SERVICES UNIT		
<b>Supervisor:</b>	Mr. BARYASHABA AMOS	<b>Contact:</b>	+256706197961

Date:	Targets	Achievements	Challenges	Lessons Learnt
Week 1	Printing of the conference materials including:- <ul style="list-style-type: none"> <li>• Posters</li> <li>• Banners</li> <li>• Book of abstract</li> <li>• Name tags</li> <li>• Document pockets</li> <li>• Certificates</li> </ul>	Successfully drafted and printed Conference materials using both Microsoft office package and adobe collection package.	Extra effort was needed to master both environments for quality work.	I managed to print the conference materials and delivered them in time.
Week 2	Drafted Letters of internship for the students in the institute.  Part of the team that organized the conference of over 200 participants at Kihumuro - MUST campus	Managed to give all students their letters.  Successfully organized the conference.	On the conference day, Power chucked but we had to hire a generator.	How the different offices interrelate and work together.  How to organize for a big number of people
Week 3	Configuring and installing of Printers.  Operating system and software applications installing in the staff's computers.	Managed to configure and install all the printers.  Operating system and software applications were installed.	Some softwares were not supported on some computers.  At time the USB cable for printers a loose which calls for buying another cable.	The hands on skills were enhanced through these activities and I can now say that I know how to do it myself.  The whole process needs someone to be patience because you are working with machines.

## HEST INTERNSHIP LOG BOOK

Week 4	<p>Maintenance and network support of the computer lab.</p> <p>Creating accounts for students on computers provided by UCC.</p>	<p>Made sure that all computers in the lab are connected to the internet to enable students enhance their research.</p> <p>Accounts were created and now students can access the computers.</p>	<p>When you are working on a new device, you need to first get its user manual for the best results.</p>	<p>Learnt how to work on different devices from computers to printers.</p> <p>How to monitor the network and how network switches operate.</p> <p>How the university systems work especially in the non-teaching session.</p>
